hi actuel,

just noticed a monomachine keyboard on ebay if your still after one. i didnt get your email tho.. weird

regards, neonleg

...that is strange! i just sent you a PM.

thanks for the word on the MnM sfx-6...i saw that too. i'm probably gonna hold out for a minute on the SFX-6. i've got a UW coming in the mail soonish and have gigs coming up as well. so its probably not the best time for swapping out my sfx60 and gathering up more funds for something i don't totally 'need'. plus, while i lusted after some of the integrated features the keys bring, i love the sheer portability of my 60.

ironically i'm PM'ing you for one of you fine machines. which of course i 'need!' :-D

peace

a

you gonna love the UW!! its the ultimo!!

i think id go for the 60, although i really need a keyboard, the 6 is heaps bigger.. dont know if i can justify the space required (without selling more gear!)

i sent you a reply thru the tube re. the sid. ill give you a heads up in a day or two.. gotta sleep on it - make sure its the right thing to do!! i hope you understand :)
all the best, neonleg
