
FS: Mint Korg MicroKontrol

Hey folks, anybody need this? I've had it for a few months, never gigged it. I'm upgrading my Monomachine to the full version (from the tabletop) and don't need it anymore.

Asking \$225 + shipping. Would prefer to ship in the US. Includes all original software, template overlays, stickers, and (drum roll please), a black nylon gig bag. I thought I'd offer it here before throwing it to the wilds of Ebay.
