well in that thread there was mention of less than \$1400 but more than \$1000. the post also suggest the Mek is bringin' some new tricks to the table.

me thinks it looks nice...counting pocket jingle

Yes, it does look nice....I'll pass, though...I'd rather save up for the PEK, plus I don't have room for more keys.

i wish he'd lose the blue colors... i'd like to see something that has the color scheme of the pro-one.

i'm sure it will sound great- as the other evolvers do

this is exactly what I was waiting for!

now my for sale list is growing.....
