
Studio Electronics????

Posted by sensorium - 2006/03/25 16:42

Just looking over their website drooling over thir gear. What are the differences in sound of the Omega8 Atc1 and SE1X? Is one better for leads, the other for bass etc??? I want one of these units, but I'm curious if the Omega8 do the job of the other 2 units in one system. Also, they have some pretty nice pedals. Is anyone using them?

I had the SE-1 and what an amazing synth for leads and bass. Its essentially a minimoog clone - I sold it in order to fund my pedal steel, otherwise I would still use it because its the fatness.
