Is it that? Which is to at the rumors around the German Synthesizer legend...?

Now, here some unspektakulaere facts are to provide for few light. Yes, it does which in the Waldorfer Laendchen... the rights became by that whale village SL, represented by Joachim Flor and Kurt Wangard, acquired. The new whale village Music GmbH is in the establishment phase and Stefan Stenzel and franc cutter as well as Michael of Garnier and Wilfried Eckl will enter.

Who is that now again?

Joachim Flor is the heading and Macher the new whale village Music GmbH Joachim was already in the establishment phase the whale villages Electronics on board and contributed considerably to their success. Kurt (Lu) Wangard, accompanied the whale village Electronics as Office manager by all heights and depths and is completely wild to see lighting up the old battle ship in the gloss of the modern times. Stefan Stenzel, Mastermind and former director/conductor of the research and development department, as well as the franc cutter, one of the initial members the whale villages Electronics, responsibly for hardware and production management, engaged themselves also during the dark days for the whale village municipality. Now the two guarantors for continuity and innovation operate again with commitment and high pressure on new projects for the rope-fresh whale village Music. For fresh wind provide Michael of Garnier and Wilfried Eckl, which throw their bundled know-how for selling and marketing into the scale pan.

In the next weeks still further partners will on board come and the team will complete, which was written ambitious targets on the flag.

Curiously? Well so!

If it is...

I'M BUYING!

:-D

Good news Jyoti... I think this says it all. Your wish will come true:

"Kurt (Lu) Wangard, accompanied the whale village Electronics as Office manager by all heights and depths and is completely wild to see lighting up the old battle ship in the gloss of the modern times."

I mean, that really says it all.

Anyway, that doesn't mean they won't get out with anything new, right?

Q+ rack is where my lust is at.

sometimes you just need a synth that is compatible of pads/leads/basses/fxes, in one word, it is versatile, polyphonic,

multitimbral. most of the time they are VA, and waldorf is my choice.

8-)

EDIT: Just gone though some in-depth info about the microwave xt. I falled in love instantly.
