
Looking at new posts in a thread?

Posted by BobTheDog - 2011/03/01 13:11

Hi Guys,

Is there a way of entering a thread at the last point you looked at it, so you just see the new posts since you last looked?

Thanks

Andy

is there really no way to do this?

the site knows which posts I've seen, because it tells me which threads have new posts and even how many new posts there are (Forum Tools -> Show latest posts) it just won't show a link to the first new one in a thread

Annoying isn't it!

I came here to post the same thing.

'View first unread post' is pretty standard and the forum would be much better if it had that feature.

I checked the FAQ as well.

Please let me know if I am missing something.
