The submissions for the MachineDrum DJ project have been compiled and are ready for download -- visit the files section.

Included are the raw materials for eighteen different tracks composed by EU forum members. See the sticky in the Elektron Lounge for details.

Just sorted all the patterns into 1 long list so that I have the rest of the machine free to play about, getting some variations and orders together (all paterns stored in banks A through to C). Thought I would upload them sorted like that in case anyone else worked that way. :)
